The world of fashion and luxury, of idlers and wasters; the world of working folk, or those struggling for near and dear dependents; these are the two worlds contrasted in this novel.
Amy Loring, through love and suffering and desperate need, is brought to comprehend the blessedness of the gospel of work, while her own mother tastes the fruits of a life lived only for self, for ease, for luxury. Yet, in depicting this family, Mrs Tuttle always holds the balance true. If riches bring out evil traits, poverty may not always flower sweetly.—Adv.

Uniform laws annotated contains the full text of all uniform laws that have been approved by the National conference of commissioners and adopted by the various states. It tells what states have adopted them and what changes, if any, have been made in their adoption. It annotates them with all the cases that have construed them from all jurisdictions.
The unique form of publication of Uniform laws annotated, with its patented supplemental device and its annual cumulative supplements, makes it a permanent set, always up to date.—Adv.

Rembrandt and his school; a critical study of the master and his pupils with a new assignment of their pictures. F xviii,178p il $12 '23 Scribner 23-14361
Mr Van Dyke, professor of the history of art in Rutgers college, is also the author of A history of painting, Art for art's sake, New guides to old masters, etc.
This book will create a sensation in the art world. As an attempt to tell the exact truth about the Rembrandt pictures and is sensational in what it reveals. Out of eight hundred pictures given to Rembrandt by experts, Professor Van Dyke can credit him definitely with only thirty-five. Several hundred so-called Rembrandts in public galleries and elsewhere are restored to the great painter's pupils. The whole Rembrandt school is reconstructed and a dozen heretofore unknown personalities revealed.—Adv.

A description of the results of the present economic system in Great Britain and the United States, indicating that down to about 1850 the economic advantages of capitalism outweighed its evil consequences. This analysis of the capitalistic regime is an attempt to point out the dangers of post-war reactionary tendencies and to help conservatives and liberals understand each other. The authors enjoy a secure and recognized position as students of social and economic questions; their books have been markedly instructive.—Adv.

Barnum. O viii,381p il $3.50 '23 Harcourt [16s J. Cape] 23-7287

To our fathers and grandfathers, P. T. Barnum was probably the most widely known American. Jester, charlatan, philosopher, financier, he made and lost fortunes, spent some time in jail, brought the first real music to America, met Queen Victoria and the continental celebrities,—and left the stamp of his personality upon the decades between 1830 and 1850. This book is a picture of the romantic early days of the United States, seen through the personality of one of our great, and, at the same time, one of our strangest men.—Adv.

Animal legends from many lands; il. by Edwin Noble; ed. by Edric Vredenburg. O 7-143p $2.50 McKay [6s 6d R. Tuck]
The gems among animal stories gathered from the ends of the earth and be they from the east or the north or the south each story has charm and interest to a rare degree. The animals behave according to their animal natures, but are also endowed with the attributes of man. We have the fox outwitting his cousin the wolf. The insignificant beetle argues with the mighty lion, who holds court and listens to his scheming confidant, the mule; while the great elephant accompanies the tiny mosquito. Superbly printed and illustrated with twelve full page color plates and numerous pen and pencil drawings by a master of animal drawing.—Adv.
Children's stories from the Arabian nights; il. by Harry G. Theaker and ed. by E. Vredenburg. O 143p $2.50 McKay
When you open the book of the Arabian nights you open the door into wonderland—even more wonderful than fairyland. The scenes are set in the gorgeous colors of the East, the actors live a magical existence and we hold our breath at the marvels that are told us. This book is a fit setting for the theme. Beautifully bound in rich blue imprinted in gold, with twelve full page color plates and numerous pen and pencil illustrations all done with true artistic reality.—Adv.
